

Aqua Color[®]
DESIGN MOSAIC

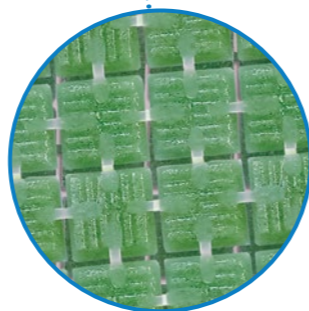

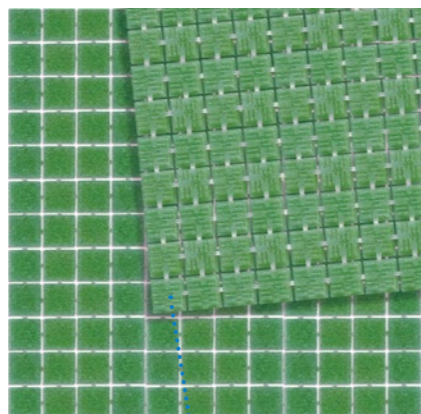

SPEC_25
www.aquacolor.eu

Assembled with Robotic Technology

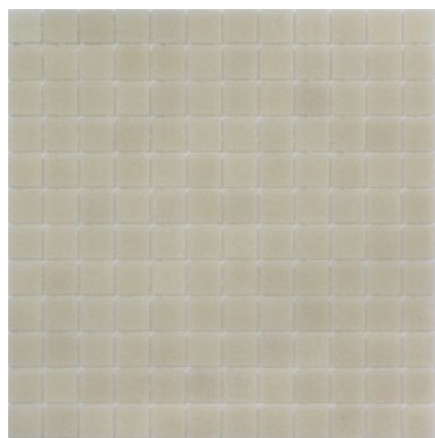

With this state-of-the-art innovative technology, silicone dots are created at the back of the mosaics for assembling them into a sheet.

- ✓ Water-resistant
- ✓ Weather-resistant
- ✓ Enables better intactness
- ✓ Easy & fast installation
- ✓ Excellent finishing
- ✓ In comparison with mesh mounted, there is a better contact between the mosaics and adhesive. It also optimizes the contact with the surface.
- ✓ In comparison with paper on the front, easier to install, followed by a better final result.
- ✓ Perfect to use for all your specification and projects: swimming pools, wellness facilities etc...
